## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

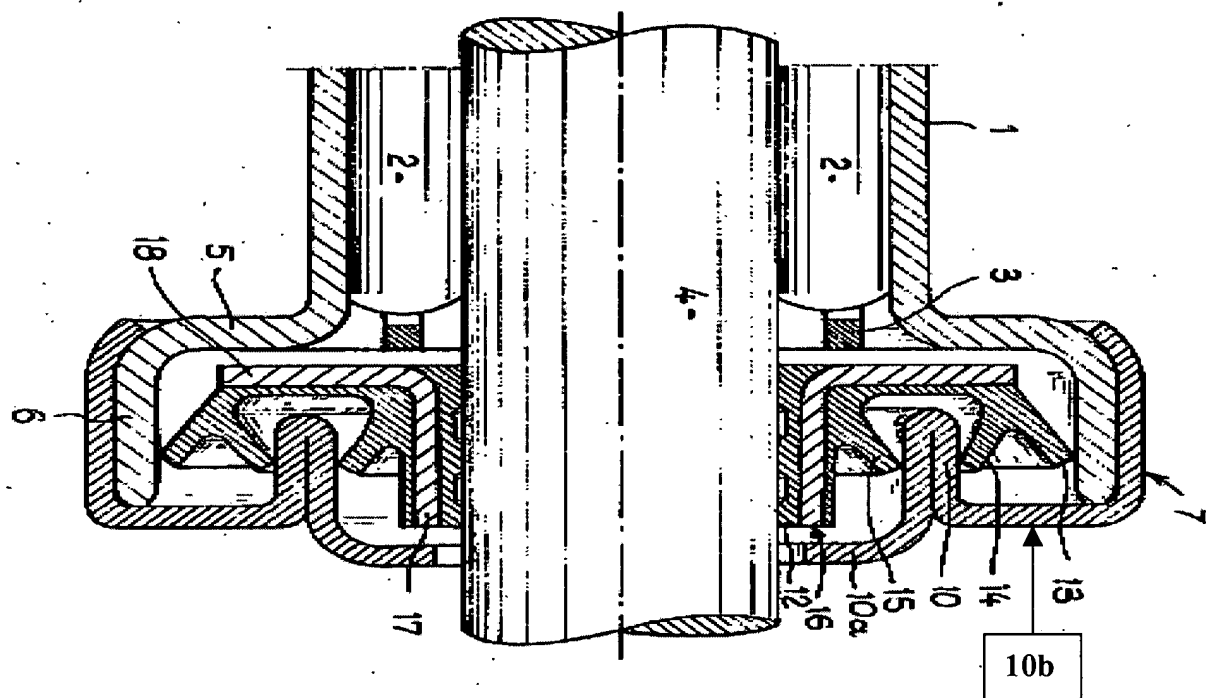

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4** are rejected under 35 U.S.C. 102(b) as being anticipated by Labedan et al. (US 4,655,618).

Labadan discloses a sealing device for a rolling contact bearing (Fig. 2) comprising two coaxial races (1, 12), two metal inserts (6, 7), sealing lip (13, 14, 15) extending between the inserts, phonic wheel (16) supported by the more external insert (7), annular housing (within 7), and annular vulcanized rubber shield (11) substantially as claimed. The housing is radially delimited by first and second cylindrical walls (10a, 10b) where the first cylindrical wall (10a) defines an internal radial support for said phonic wheel (16) and the second cylindrical wall defines an annular channel (at 13 and 14) with the other insert (5, 6). The second wall presents a cylindrical edge (at 7) folded towards the other insert (5,6) and which defines an outer radial limit for the shield (11 at 13, 14). The shield (11) has two opposite ends (13/14 and 15) where one end defines a static seal with a race (12) and the other end (13/14) defines a dynamic seal sealing the channel.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 3,011,814 to Rhoads et al., US 3,099,454 to Walinski, US 4,436,317 to Schmitt, US 4,448,426 to Jackowski et al., US 5,398,942 to Duckwall et al., US 5,458,420 to Otto, and US 5,501,469 to Ducugnon et al.
